## 1 INTRODUCTION

1.1 Overview

Tableau Public is a free platform to explore, create and publicly share data visualizations online.
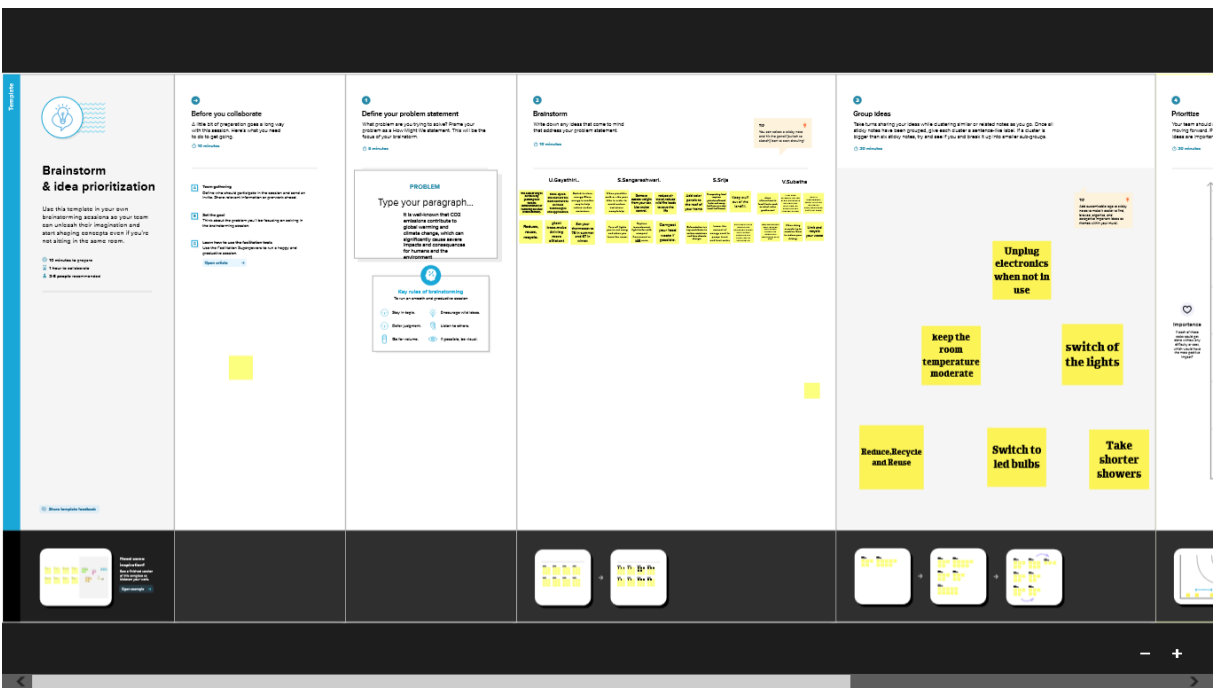

.2 Purpose

With the largest repository of data visualizations in the world to learn from, Tableau Public makes developing data skills easy.

## 2 Problem Definition & Design Thinking

2.1 Empathy Map

What have we heard them say?
What can we imagine them saying?

carbondioxide is denser than air

co2 is stored as a liquid in cyinder

high availability,low maintenance

co2 is the fourth most abundant gas in the earths atmosphere

carbondioxide has no taste,colour or smell

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

carbomdioxide can be used to increase growth of flowers

carbondioxide exists naturally in the atmosphere

Give them a name and a portrait to empathize with your persona.

pollution free,less maintenance

carbondioxide is transported to the blood in three ways

it is one of the green energy available in the earth

carbondioxide is essential for internal respiration in human body

carbon is in carbondioxide which is a green house gas that traps heat close to earth

it is used in fire extinguishers

2.2 Ideation & Brainstorming Map

3 RESULT

. 4 ADVANTAGES & DISADVANTAGES

List of advantages and disadvantages of the proposed

solution **5 APPLICATIONS**

Food and beverage production,cooling,stimulating plant growth in
greenhouse

 6 CONCLUSION

Analysis of co2 has been used to create sheets,dashboard and story

7 FUTURE

**These emissions are controlled by a company,upstream and
downstream emission and indirect GHG emission**

8 APPENDIX

A. Source Code

Attach the code for the solution built.

Smart Internz Project Report Template
